SUMMARY

As a fresh graduate Node.js Backend Developer, I have built and maintained RESTful APIs, worked with relational and NoSQL databases, and solved complex coding challenges through academic projects. I am eager to learn new technologies and aspire to build scalable backend systems while contributing to real-world projects

EDUCATION

University of Transport Ho Chi Minh City Sep 2022 - Present

Bachelor - Information Technology

- Final-year Student
- GPA: 3.33/4.0

SKILLS

Languages:	JavaScript (ES6+), TypeScript, HTML5, CSS3.
Runtime/Technologies:	Node.js, Redis, Firebase.
Frameworks/Libraries:	Express.js, NestJS, React, Tailwind CSS, Bootstrap.
Databases/ORM:	PostgreSQL, MongoDB, Prisma.
Backend & API Development:	RESTful API,CRUD, JWT Authentication, Role-Based Access Control (RBAC), MVC Architecture
Others	Git, GitHub, Vercel, Docker, Docker Compose, Postman, Jira, Confluence, Basic System Design, Database Design.

PROJECTS

FoodNow | Full-stack Developer (Backend-focused) Nov 2025 - Dec 2025

Tech Stack: Node.js, Express.js, PostgreSQL, Prisma ORM, JWT, React, Vite, React Router, Tailwind CSS, Docker, Docker Compose, Git, Postman.

Key Contributions:

- Built a multi-shop cart system supporting per-shop vouchers and automatic total calculation.
- Implemented end-to-end order workflows (pending → completed) and integrated VNPay & COD payments.
- Developed RESTful APIs with validation, error handling, and RBAC authentication (JWT, Firebase Auth).
- Designed a PostgreSQL schema with Prisma ORM and built Admin & Shop dashboards for order and product management.
- Developed the frontend using React, React Router, and Tailwind CSS.

GitHub: https://github.com/ThanhHiepNguyen/FoodNow.git

Vitify | Backend for Mechanical Fasteners E-commerce System Jan 2026 - Mar 2026

Tech Stack (Backend): NestJS, Node.js, TypeScript, PostgreSQL, Prisma ORM, Redis, JWT, Git, Postman

Key Contributions:

- Designed a modular backend architecture in NestJS (Auth, User, Product, Category, Cart, Order, Payment, Review).
- Implemented JWT authentication and RBAC.
- Built product & category APIs with filtering and pagination.
- Developed a Redis-based shopping cart and order management with COD payment flow.
- Built product review & rating features.
- Developed RESTful APIs with DTO validation and Prisma ORM for PostgreSQL.

WORK EXPERIENCE

IriTech, Inc. Apr 2025 - Jun 2025

Mobile Developer

- Developed an Android iris recognition application using IriTech SDK.
- Implemented enrollment, identity verification, and data management with Room Database.
- Improved UI/UX with multi-language support (vi, en, zh, ko).
- Tested and deployed on real Android devices via Android Studio and ADB.

CERTIFICATE

PTE Academic Overall Score: 44
